

# Particles and the Standard Model

---

IB PHYSICS | ATOMIC PHYSICS

What is the “Fundamental Particle”?

# Fundamental Particles

Charge	Quarks			Baryon Number
$\frac{2}{3}$	u	c	t	$\frac{1}{3}$
$-\frac{1}{3}$	d	s	b	$\frac{1}{3}$

All quarks have a strangeness number of 0 except the strange quark that has a strangeness number of  $-1$

Charge	Leptons		
$-1$	e	$\mu$	$\tau$
0	$\nu_e$	$\nu_\mu$	$\nu_\tau$

All leptons have a lepton number of 1 and antileptons have a lepton number of  $-1$

Symbol	Name	Symbol	Name
u		e	Electron
d		$\mu$	Muon
c		$\tau$	Tau
s		$\nu_e$	_____ Neutrino
t		$\nu_\mu$	_____ Neutrino
b		$\nu_\tau$	_____ Neutrino

Antiparticles have the opposite charge as their corresponding particle and have a bar over their symbol

Symbol	Name	Charge
s	Strange	$-\frac{1}{3}$
$\bar{s}$	Antistrange	$+\frac{1}{3}$

# IB Physics Data Booklet

Sub-topic 7.1 – Discrete energy and radioactivity		Sub-topic 7.2 – Nuclear reactions																												
$E = hf$ $\lambda = \frac{hc}{E}$		$\Delta E = \Delta m c^2$																												
Sub-topic 7.3 – The structure of matter

# Fundamental Particles

Symbol	Name	Charge	Baryon #
u	Up	$+\frac{2}{3}$	$\frac{1}{3}$
d	Down	$-\frac{1}{3}$	$\frac{1}{3}$
c	Charm	$+\frac{2}{3}$	$\frac{1}{3}$
s	Strange	$-\frac{1}{3}$	$\frac{1}{3}$
t	Top	$+\frac{2}{3}$	$\frac{1}{3}$
b	Bottom	$-\frac{1}{3}$	$\frac{1}{3}$

Symbol	Name	Charge	Lepton #
e	Electron	-1	1
$\mu$	Muon	-1	1
$\tau$	Tau	-1	1
$\nu_e$	Electron Neutrino	0	1
$\nu_\mu$	Muon Neutrino	0	1
$\nu_\tau$	Tau Neutrino	0	1

Symbol	Name	Charge	Baryon #
$\bar{u}$	Antiup	$-\frac{2}{3}$	$-\frac{1}{3}$
$\bar{d}$	Antidown	$+\frac{1}{3}$	$-\frac{1}{3}$
$\bar{c}$	Anticharm	$-\frac{2}{3}$	$-\frac{1}{3}$
$\bar{s}$	Antistrange	$+\frac{1}{3}$	$-\frac{1}{3}$
$\bar{t}$	Antitop	$-\frac{2}{3}$	$-\frac{1}{3}$
$\bar{b}$	Antibottom	$+\frac{1}{3}$	$-\frac{1}{3}$

Symbol	Name	Charge	Lepton #
$\bar{e}$	Antielectron (positron)	+1	-1
$\bar{\mu}$	Antimuon	+1	-1
$\bar{\tau}$	Antitau	+1	-1
$\bar{\nu}_e$	Electron Antineutrino	0	-1
$\bar{\nu}_\mu$	Muon Antineutrino	0	-1
$\bar{\nu}_\tau$	Tau Antineutrino	0	-1

# Classifying Particles

# Baryons

All Baryons are formed from a combination of 3 quarks or antiquarks

Proton

Neutron

Rule:

Charge must be an integer value (-1, 0, or +1)

Up Quark  
Charge =

Down Quark  
Charge =

# Mesons

All Mesons are formed from a combination of a quark and antiquark

Kaon

Rule:

Charge must be an integer value (-1, 0, or +1)

D-Meson

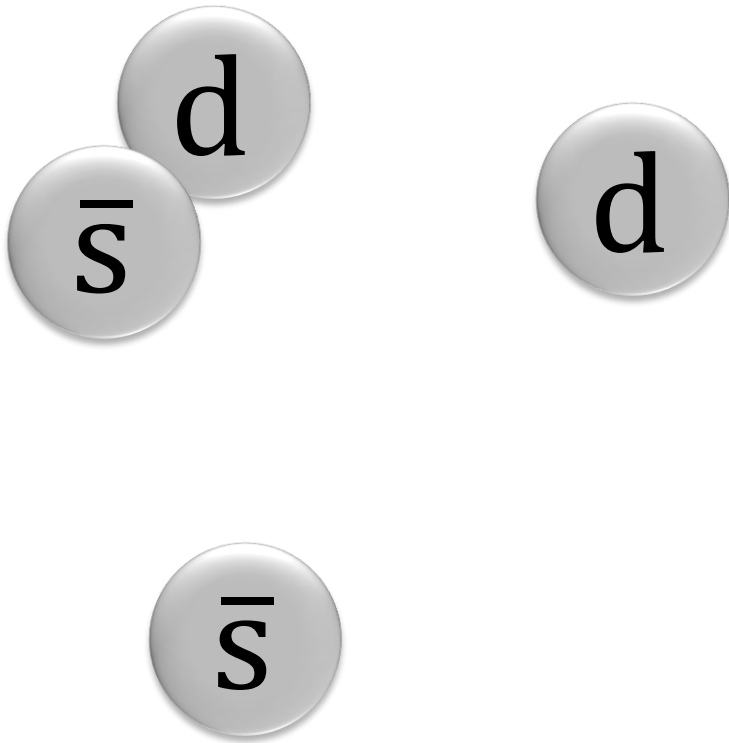

Charge	Quarks			Baryon Number
$\frac{2}{3}$	u	c	t	$\frac{1}{3}$
$-\frac{1}{3}$	d	s	b	$\frac{1}{3}$

All quarks have a strangeness number of 0 except the strange quark that has a strangeness number of -1

# Quark Confinement

Quarks have never been observed on their own

The amount of energy required to overcome the strong nuclear force holding the quarks together gets converted into mass and forms a new quark pair

# Conservation

For an interaction to be possible, the following must stay conserved:

Baryon #	Lepton #	Charge	Strangeness
----------	----------	--------	-------------

Baryon #				
Lepton #				
Charge				

# Conservation

$$p + e^{-} \rightarrow n + \nu_e$$

$$n + p \rightarrow e^{+} + \bar{\nu}_e$$

# Exchange Particles

At the fundamental level of particle physics, forces are explained in terms of the transfer of **exchange particles (gauge bosons)** between the two particles experiencing the force

Repulsion

Attraction

*These interactions are not observable, so we call them **virtual particles***

# Types of Forces

	Gravitational	Weak	Electromagnetic	Strong
Particles experiencing	All	Quarks, leptons	Charged	Quarks, gluons
Particles mediating	Graviton	$W^+, W^-, Z^0$	$\gamma$	Gluons

# Sample IB Question

26. Which of the following lists three fundamental forces in increasing order of strength?
- A. electromagnetic, gravity, strong nuclear
  - B. weak nuclear, gravity, strong nuclear
  - C. gravity, weak nuclear, electromagnetic
  - D. electromagnetic, strong nuclear, gravity

	Gravitational	Weak	Electromagnetic	Strong
Particles experiencing	All	Quarks, leptons	Charged	Quarks, gluons
Particles mediating	Graviton	$W^+, W^-, Z^0$	$\gamma$	Gluons

# The Standard Model

CERN: The Standard Model Of Particle Physics

# Sample IB Question

27. For which reason were quarks first introduced?
- A. To explain the existence of isotopes
  - B. To describe nuclear emission and absorption spectra
  - C. To account for patterns in properties of elementary particles
  - D. To account for the missing energy and momentum in beta decay

# The Standard Model

Three Generations of Matter (Fermions)
