## Velocity Graphs

IB PHYSICS | MOTION

## What is...

Speed

Velocity

## What is a Vector?

A Vector is a quantity that includes both direction and magnitude

## Vector vs Scalar

Vector Quantities

## Scalar Quantities

## An object not moving

## An object moving forward

## An object moving backward

## Showing Velocity

## Speeding Up (moving positive)

## Speeding Up (moving negative)

## How are these Similar?

v

t

## Slowing Down (moving positive)

## Slowing Down (moving negative)

## Velocity vs Time Graphs

Which graph(s) represent an object moving in the negative direction?

Which graph(s) represent an object slowing down?

## What is...

Velocity

Acceleration

Types of Acceleration

## Acceleration is Related to Force

## Acceleration | Slowing or Speeding?

When the acceleration is in the same direction as the velocity the object is $\qquad$
"Foot on the Gas"

When the acceleration is in the opposite direction as the velocity the object is $\qquad$
"Foot on the Brake"

## Lesson Takeaways

I can describe the difference between speed and velocity
$\square$ I can compare the difference between a vector and scalar quantity

I can plot constant velocity on a velocity vs time graph
I can plot changing velocity on a velocity vs time graph
$\square$ I can use a velocity vs time graph to identify if an object is moving in the positive or negative direction as well as if it is speeding up or slowing down
I can define acceleration in terms of velocity
